EXECUTIVE SUMMARY

Information Science undergrad with hands-on experience in Python, SQL, and Power BI through coursework projects analyzing sports, business, and relational data. Strong communicator with a foundation in data analysis and programming and a proven ability to translate raw data into clear, actionable insights.

EDUCATION

University of Colorado Boulder, **BS in Information Science, Minor in Business Analytics** **December 2026**

Major GPA: 3.6

Relevant coursework: Fundamental Concepts in Data Science, Fair Machine Learning, Data-Centered Systems, Information & Data Retrieval Systems, Statistics for Information Science, Programming for Info Science I & II, Quantitative Reasoning, Business and Financial Analytics I & II.

Certificates: **IBM Data Science Professional Certificate (WIP), Pl-300 (WIP)**

DATA PROJECTS

Visualizing NHL Data: A Statistical Exploration

- Analyzed NHL performance statistics using Python (Pandas), identifying key discrepancies in gameplay style, goal differential, scoring trends, and attendance over time.
- Developed visualizations with Matplotlib and Seaborn to communicate findings and propose data-backed explanations based on attendance trends, scoring trends, and underperformance.

Ski Ride-Share Database

- Designed a normalized relational database in MySQL to model a ski resort ride-share service, structuring driver, rider, and ride data with primary/foreign key relationships to support accurate and scalable querying.
- Developed SQL queries using joins, aggregate functions (AVG, COUNT, MAX), and nested subqueries to uncover business insights, including pricing trends, popularity, and rider skill level patterns.
- Connected the database to Python (SQLAlchemy, Pandas) to query, clean, and analyze data.

Student Productivity & Finance Dashboard

- Built and implemented a relational database in Supabase(PostgreSQL) with 13 interconnected tables, structuring data across student schedules, coursework, finances, and productivity tracking.
- Generated a synthetic dataset of 500+ realistic records using Python(Pandas, Faker) to populate and stress-test the database across all tables.
- Wrote complex SQL queries to join and aggregate data across the schema, supporting real-time financial summaries and productivity trend visualizations.

PROFESSIONAL SKILLS

Programming & Analytics: Python, SQL, Excel, PowerBI, Tableau, Pandas, NumPy, Matplotlib, Seaborn
Databases & Other Tools: MySQL, PostgreSQL, Supabase, SQLAlchemy, APIs & JSON, MongoDB, Git, Docker

PROFESSIONAL EXPERIENCE

Crew Line Associate / Sales Consultant - Waterway Car Wash **Oct 2021 - Aug 2024**

- Assisted up to 400+ customers on peak days, guiding package selection based on individual needs/sales goals, and drawing on knowledge from multiple departments regarding sales quotas and revenue.
- Maintained rigorous attention to detail while optimizing multiple operations and quality standards, ensuring consistently high customer satisfaction rates.
- Identified and addressed multiple inefficiencies in daily routines to reduce delays.

Food Expo - Boulder Country Club **May 2025 - Present**

- Served an average of 350+ members per day, coordinating high-volume order flow and verifying accuracy at each stage to maintain consistent service standards.
- Applied strong attention to detail to identify and resolve order discrepancies in a fast-paced, multi-order environment before they impacted customers.
- Streamlined communication between departments to reduce errors and improve operational efficiency during peak volume periods.
